

Online Store Sales Analysis with Power BI

- Hishaam J

Objective:

The objective of this assignment is to strengthen Power BI skills by creating DAX calculated columns and measures to generate meaningful business metrics and designing interactive dashboards that analyze sales performance, profitability, targets, and business trends using an e-commerce dataset.

Dataset:

The analysis is based on three related datasets:

- List of Orders – Order details, customer, location, category, amount, and profit.
- Order Details – Category, sub-category, quantity, amount, and profit.
- Sales Target – Monthly sales targets for each category.

Tasks Performed:

- Created calculated columns such as Category Type, Revenue per Order, and Sales Category.
- Developed DAX measures including Order Count, Average Profit in Delhi, and Year-to-Date (YTD) Sales.
- Built interactive visualizations to compare actual sales with targets, analyze profit margins, monitor monthly sales trends, evaluate sales by geography, compare profit and quantity, and display business KPIs through charts, maps, cards, matrices, treemaps, and funnel charts.

Formulas/ Measures Used:

1. Sales Category = IF('Order Details'[Revenue]<10000,"Below Average",
"Above Average")

2. YTD Sales = TOTALYTD(
[Total Revenue],
'List of Orders'[Order Date].[Date]
)

3. Average profit in Delhi = CALCULATE(AVERAGE('Order Details'[Profit]),
'List of Orders'[State]= " Delhi"
)

4. Total Target = SUM('Sales target'[Target])

5. Category Type = CONCATENATE('Order Details'[Category],
" "&'Order Details'[Sub-Category]
)

6. Revenue = 'Order Details'[Amount]*'Order Details'[Quantity]

Conclusion:

This assignment demonstrates the practical use of Power BI and DAX to transform raw e-commerce data into meaningful business insights. By creating calculated columns, measures, and interactive dashboards, it enables effective analysis of sales performance, profitability, targets, and regional trends, supporting informed business decision-making while enhancing data visualization and analytical skills.
